

mBrain Software announces three new editions of Pdf+ 1.75 for S60 3rd edition and UIQ 3.x

7 November 2007

Leiden, The Netherlands – Today, mBrain Software announces the imminent release of three new editions of Pdf+, the leading PDF reader for Symbian smartphones.

Pdf+ Basic offers basic functionality. Users can view all pages, go to any page, search for strings, set the zoom level, full screen and landscape mode and reflow the text. Chinese and Japanese PDF files are fully supported. Email attachments and PDF files downloaded from the Web can be read as well.

Pdf+ Standard offers in addition bookmark support, following of links, opening of websites, sending Emails and dialing phone numbers. Full support for password-protected PDF files is available in this version too.

Pdf+ Professional offers in addition full printing support. The creation of PDF files is possible through the inclusion of PdfPrinter, a printer driver that is capable of creating PDF files from most programs that can print.

All editions of Pdf+ support shortcuts for quick access to often-used commands.

”As the range of Symbian smartphones grows, the needs of their users are diverging more and more. It is now possible to choose the PDF reader that fits your needs, and that matches the capabilities of your device more closely.”, says Sander van der Wal, owner of mBrain Software.

Pdf+ Basic, Standard and Professional for S60 3rd edition will be available later this year, as will be Pdf+ Basic and Pdf+ Standard for UIQ 3.x. Pdf+ Professional for UIQ 3.x will be made available as soon as printing support for UIQ 3.x becomes available.

Pricing will be EUR 9,95 for Pdf+ Basic, EUR 19,95 for Pdf+ Standard and EUR 29,95 for Pdf+ Professional. All prices are excluding VAT. It will be possible to upgrade from Pdf+ Basic to Pdf+ Standard, and from Pdf+ Standard to Pdf+ Professional for EUR 10,--.

Current S60 3rd edition and UIQ 3.x Pdf+ users will be able to upgrade for free to Pdf+ Professional.
